

Some Things From Childhood Are Best Left Behind – Vaccines Aren't One of Them

Unfortunately, for many adults, annual vaccinations are a distant childhood memory, leaving them vulnerable to illness. Did you know that about 50,000 adults die each year from vaccine-preventable diseases? Adults should get vaccines to protect them against many serious illnesses, including:

⌚	Hepatitis B	(Engerix-B)
⌚	HPV	(Gardasil)
⌚	MMR	(MMRII)
⌚	MCV	(Menactra)
⌚	PPV23	(Pneumovax)
⌚	Td	(Decavac)
⌚	Tdap	(Boostrix/Adacel)
⌚	Varicella	(Varivax)

**Now available for Un-insured or Under-insured Adults only.
\$10.00 private pay per shot/vaccination.**
